WORK EXPERIENCE

Web Development

Brisbane, QLD

Olive Way – Ecommerce clothing brand (Full Stack) (Postgres, Ruby on Rails, slim)

2016

- Quickly learned and comprehended the technologies used in an existing codebase.
- Came up with solutions to seemingly intractable problems.
- Performed front end optimizations to improve user experience.
- Fixed database schema and performed database migrations.

Richard Groves Architects - Architecture firm (Html/CSS/jQuery)

2016-2017

- Developed with the client an extensive requirements list.
- Designed and drew paper prototypes to ensure requirements were satisfied.
- Implemented clean and maintainable code in html/css/jQuery using best practices.
- Integrated company with Google, Google maps, and Facebook. Performed SEO.
- Worked independently through a project life cycle.

Private Tutoring

Brisbane, QLD

High School Tutor for Math B, Physics, and Chemistry.

2015-Present

- Explained complex concepts using easy to understand terms.
- Developed action plans based on students' academic goals.
- Communicated with parents to update them on their child's progress.

Bar Staff, Hospitality

Brisbane, QLD

Brothers Rugby Club

2015-2016

- Maintained high standards of customer service during high volume and fast paced operations.
- Built loyal customers through friendly interactions and consistent appreciation.

PROJECTS

SyncUQ

A University of Queensland exclusive schedule sharing and social media platform. It allows users to find out whether their friends are free as they go on a lunch break at university. (due for release May 2017)

Frontend: **Purescript, JavaScript**

Backend: **Python** (using **Flask** and **SQLAlchemy**), **Postgres**, **Heroku**

Duxcom

Open source, turn based isometric game. Developed with a team of 50+ in **Java** using **Continuous Integration** and **TDD**. The project was fully integrated with tools such as **Git**, **Jenkins** (to assist with continuous integration), and **SonarQube** (To ensure clean code).

Tetris

A remake of the classic game tetris using a 74HCT chip kit and programmed using Atmel Studio and **the C programming Language**. The game contained features such as high score tracking, joystick support, and 8-bit sound.
